## PROFESSIONAL SUMMARY

Fashion management professional (MPS, Parsons School of Design, 2025; B.F.Tech, NIFT Delhi) with hands-on work across the fashion value chain: consumer research, designer retail, marketplace data and apparel manufacturing. Brings primary research, data analysis (Excel, SQL, Python), measured factory-floor improvements and client-ready presentation of findings.

## PROFESSIONAL EXPERIENCE

**HANDSHAKE AI** | Research Fellow – Fashion & Retail Domain — **Sep 2025 – Sep 2026**

- Evaluated and revised AI outputs for frontier-model training across 35+ fashion-retail taxonomies (garment attributes, product content, size/fit, sustainability claims, merchandising logic), applying domain judgment to accuracy.
- Converted feedback into labels, rubrics and issue logs and built repeatable human-in-the-loop QA workflows; review consistency reached 96% and repeat classification errors fell 22%.

**BLOOMINGDALE'S 59TH STREET, NEW YORK** | Seasonal Sales Associate, Men's Designer & Sportswear — **Oct 2025 – Jan 2026**

- Generated $3K–$3.5K average daily and $7K–$8K peak-day sales across 12+ designer brands, with a first-hand view of how customers trade off fit, fabric, price, occasion and brand.
- Built 6–7 repeat-client relationships; logged availability gaps, fit/color preferences and promotion response, turning recurring selling-floor patterns into consumer and demand insight.

**A SPACE, IN BETWEEN** | Fashion Management Intern | Tokyo / Remote — **Feb 2025 – May 2025**

- Ran competitor research and product storytelling for wholesale and digital merchandising; translated findings into user and business requirements for a plus-size platform and coordinated implementation.
- Redesigned a 24-screen onboarding and body-data journey in Figma and React/Next.js, cutting onboarding steps 25%; delivered 18 structured UX and content recommendations.

**SHAHI EXPORTS LTD., NEW DELHI** | Industry 4.0 Research Fellow — **Jan 2024 – Jul 2024**

- Diagnosed cutting-to-sewing material flow: mapped 14 factory workflows and analysed 15,000+ movement events; designed and piloted an autonomous WIP transport system (RFID, line-following, obstacle sensing).
- Pilot cut material movement 22% and transfer cycles 18% with 92% route reliability; built a 12-month ROI case and presented the trade-offs to senior management, production and engineering teams.

**INZEX TEXTILES LTD.** | IE / Data & IoT Intern — **Jun 2023 – Jul 2023**

- Delivered four projects: Myntra PPMP fulfilment analysis, sales & inventory dashboards, WIP visibility and a low-cost IoT needle-runtime tracker for sewing-line utilization and capacity decisions.
- Built brand, SKU, city, category and assortment-depth views in Google Data Studio to support allocation, replenishment, markdown and OTB/WSSI decisions; IoT tracking contributed to a 25% output gain.

**WELSPUN INDIA LTD. – VAPI** | Manufacturing Intern — **Jun 2022**

- Quantified waste across five operating areas of a home-textile plant and identified weaving as the largest loss source.
- Proposed tuck-in selvedge mechanisms for 168 Dobby looms, with a hard-waste reduction potential of ~300 kg/day (~109,500 kg/year).
- Mapped towel production and buyer-led testing/development handoffs across NEDGraphics, DPCS and MDM.

## SELECTED RESEARCH & ANALYTICS PROJECTS

**NAVA COLLECTIVE – PARSONS CAPSTONE** | Consumer research, ANOVA, Willingness-to-pay, Pricing, Business model

- Conducted consumer research for a marketplace concept serving independent upcycling creators; survey analysis (ANOVA) defined target segments, willingness-to-pay and launch priorities.
- Turned findings into a business model and MVP built on verified sellers, local returns, transparent fees and tiered commissions to cut trust and discovery friction; featured by Parsons.

**TREND SPIKE RADAR – SELF-DIRECTED PROTOTYPE** | Python, FastAPI, SQLite, SQL, React, Chart.js

- Built a trend-intelligence prototype that tracks public fashion social signals by city and time (frequency, velocity, sentiment) in Python/SQLite/FastAPI, with a comparison dashboard.
- Used LLM-assisted classification to link signal spikes with news and events across markets; sense-checked outputs through field observation in five New York neighborhoods.

## BRAND & CREATIVE STRATEGY

Concept-to-edit campaign film for Daydream AI (independent portfolio project); controlled fashion-visual workflows in Midjourney, DALL·E, Firefly and Stable Diffusion that preserve garment fidelity and brand coherence.

## EDUCATION

**PARSONS SCHOOL OF DESIGN – MPS Fashion Management** — **2024 – 2025**
GPA 3.88/4.00 | Consumer research, fashion business strategy, commercial analysis, retail finance, merchandising, operations

**NIFT DELHI – B.F.Tech Fashion Technology (Apparel Production)** — **2020 – 2024**
GPA 8.5/10 | Apparel Merchandising, Production Planning, Research Methodology

## AWARDS

**NIFT Delhi department awards (WIP robot):** Best Graduation Project | Most Innovative Project | Most Commercially Viable Project
**Industry recognition:** Shahi Exports Industry 4.0 Fellowship ($1,100) | Bharat Tex 2025 presenter (WIP robot)
**Parsons School of Design:** MANGO Scholarship ($20,000) | Capstone Showcase, Parsons FM Festival

## SKILLS

**Research & strategy:** Primary & secondary research; consumer surveys & segmentation; competitor research; willingness-to-pay & pricing analysis; ROI business cases; client-ready reporting
**Merchandising & commercial:** Assortment & inventory analysis; OTB/WSSI; allocation, replenishment & markdown; vendor onboarding; retail demand insight; KPI reporting
**Operations & process:** Apparel operations & IE; process & material-flow mapping; waste & loss analysis; stakeholder communication
**Analytics & tools:** Excel, PowerPoint, Power BI, Google Data Studio, SQL, Python, ANOVA & statistical analysis; Figma
**AI:** RLHF evaluation, rubric-based QA, output validation; ChatGPT, Claude, OpenAI, n8n, Cursor
**Certifications:** Business Analysis & Process Management; MATLAB Machine Learning; MATLAB Deep Learning; Visual Storytelling; Digital Marketing Trends
**Languages:** English (Fluent); Hindi (Native); French (Foundational)
